

The Interface of Clinical Neuropsychology With Anxiety, & Stress

Antonio E. Puente

University of North Carolina at Wilmington

Madrid, May 21, 1998

- I. What is Clinical Neuropsychology?
- II. Status of Clinical Neuropsychology Research
- III. Current Trends in Neuropsychology
- IV. Role of Stress and Anxiety in Neuropsychological Functioning
- V. Rehabilitation of Stress and Anxiety in Neuropsychological Cases
- VI. Case Studies
- VII. Trends in the Application of Psychology in the US

What is Neuropsychology?

1. Importance of Defining Neuropsychology
2. Defining the Discipline
2. Board Certification and Infighting

Status of Neuropsychological Research

1. Where Have We Been?
2. What is Hot and What is Not

Current Trends in Clinical Neuropsychology

1. Survey Results
2. Economic and Political Concerns
3. Research Trends

Role of Stress and Anxiety in Neuropsychological Functioning

1. Neurological Mediated Disorders
2. Secondary Effects of Brain Injury
3. Effects of Stress and Anxiety
4. Stress and Anxiety as Either Coping Strategy or Malingering
5. Possible Reasons Why Stress and Anxiety are Poorly Understood

Rehabilitation of Stress and Anxiety Disorders in Neuropsychological Cases

1. Traditional Techniques
2. Non-Traditional Techniques
3. Intended Effects

Cases Studies

1. Head Injury Resulting in Stress and Anxiety
2. Stress and Anxiety Appearing as Head Injury

Trends in the Application of Psychology

1. Economics
2. Socio-political Changes
3. Parity
4. Illustrations of Current Issues
